WORK EXPERIENCE

STANADYNE (Pure Power Technologies)

Assistant Plant Manager – Automation & Operations

2025 – 2026

- Lead Production, Maintenance, Quality, Engineering, Supply Chain, and Production Control teams supporting plant readiness and operational stability.
- Direct prototype builds, pilot events, process validation, and production ramp activities for new product launches.
- Lead launch readiness reviews and KPI reporting; improved manufacturing cycle time by 15% through Lean line balancing and material flow optimization.

SHAPE CORPORATION

Special Projects Engineer – Advanced Automation

2024 – 2025

- Led manufacturing automation integration supporting new automotive product launches and production readiness.
- Partnered with operations, engineering, maintenance, and logistics during prototype and pilot builds; implemented PLC, sensor, and automated inspection systems.

STANT

Director, Corporate Manufacturing Services – Global Automation

2022 – 2024

- Led global launch governance across multiple manufacturing facilities ensuring plant, equipment, supplier, and workforce readiness.
- Directed Manufacturing, Quality, Maintenance, Engineering, and Supply Chain teams through launch execution, SOP readiness, and executive reviews.

STANT USA

Director, Global Advanced Automation & Engineering

2014 – 2022

- Directed end-to-end manufacturing launches from concept through stable production across global automotive programs.
- Managed APQP, process validation, commissioning, Run @ Rate, production ramp, and capital execution; presented launch status to executive leadership.

STANT USA

Director, Global Launch & Automation Projects

2012 – 2013

- Led launch war rooms, issue resolution, engineering changes, equipment buyoffs, workforce training, and Job #1 execution.

STANT USA

Director, Global Manufacturing Engineering / Plant Manager

2011 – 2012

- Managed plant operations while implementing global manufacturing and launch readiness standards; improved productivity, quality, delivery, and cost through Lean.

AMERICAN AXLE & MANUFACTURING

Lead Manufacturing Engineer

2006 – 2011

- Supported manufacturing launch readiness, process validation, equipment commissioning, and production ramp for driveline programs.

COMTECH INTERNATIONAL DESIGN GROUP

Corporate Launch Engineer

2002 – 2006

- Coordinated equipment suppliers, plant operations, and logistics teams ensuring successful manufacturing readiness and SOP execution.

SKILLS

Core: Plant Launch Leadership, SOP / Job #1 Readiness, Cross-Functional Leadership, Stellantis Industrial System (SIS), Workplace Integration Process (WIP), Launch War Rooms, Process Validation, Run @ Rate, Lean Manufacturing, Structured Problem Solving, Union Manufacturing, Executive Reporting

Technical: APQP, PPAP, PFMEA, Control Plans, Six Sigma, TPM, Robotics (Fanuc, ABB, Yaskawa), Allen-Bradley & Siemens PLCs, MES/SCADA, Industry 4.0, Automated Assembly & Machining, KPI Dashboards

EDUCATION

Lawrence Technological University | Master of Engineering – Manufacturing Systems
