WORK EXPERIENCE

STANADYNE (Pure Power Technologies)

Assistant Plant Manager – Automation & Operations

2025 – 2026

- Directed 6 cross-functional organizations—Production, Maintenance, Quality, Engineering, Supply Chain, and Production Control—to drive plant readiness and stabilize high-volume operations
- Led end-to-end launch execution across prototype builds, pilot events, process validation, and production ramp to hit SOP / Job #1 readiness gates on schedule
- Cut manufacturing cycle time by 15% through Lean line balancing and material-flow optimization while holding safety, quality, delivery, and cost KPIs

SHAPE CORPORATION

Special Projects Engineer – Advanced Automation

2024 – 2025

- Led advanced automation integration for new automotive product launches, aligning operations, engineering, maintenance, and logistics through prototype and pilot build phases
- Deployed PLC, sensor, and automated inspection systems that improved launch quality and reduced process variation during production readiness

STANT

Director, Corporate Manufacturing Services – Global Automation

2022 – 2024

- Owned global launch governance across multiple manufacturing sites, aligning plant, equipment, supplier, and workforce readiness for on-time SOP execution
- Led 5 core organizations (Manufacturing, Quality, Maintenance, Engineering, Supply Chain) through launch execution; standardized launch reviews, risk mitigation, and recovery planning

STANT USA

Director, Global Advanced Automation & Engineering

2014 – 2022

- Directed end-to-end global automotive manufacturing launches for 8 years—from concept through stable production—spanning APQP, commissioning, Run @ Rate, and production ramp
- Owned process validation, capital execution, and launch timing; presented status, risks, and recovery plans to executive leadership to drive cross-functional accountability

STANT USA

Director, Global Launch & Automation Projects

2012 – 2013

- Ran launch war rooms controlling issue resolution, engineering changes, equipment buyoffs, and workforce training to deliver Job #1 on launch timing

STANT USA

Director, Global Manufacturing Engineering / Plant Manager

2011 – 2012

- Dual-hatted as Plant Manager and Global Manufacturing Engineering leader; improved productivity, quality, delivery, and cost through Lean and Daily Management Systems

AMERICAN AXLE & MANUFACTURING

Lead Manufacturing Engineer

2006 – 2011

- Drove manufacturing launch readiness for driveline programs over 5 years, owning process validation, equipment commissioning, and production ramp support

COMTECH INTERNATIONAL DESIGN GROUP

Corporate Launch Engineer

2002 – 2006

- Coordinated equipment suppliers, plant operations, and logistics across a 4-year launch portfolio to achieve manufacturing readiness and successful SOP execution

SKILLS

Launch: Plant Launch Leadership, SOP / Job #1 Readiness, Launch War Rooms, Process Validation, Run @ Rate, APQP, PPAP, PFMEA, Control Plans, Equipment Commissioning, Production Ramp-Up

Operations: Cross-Functional Leadership, Lean Manufacturing, Structured Problem Solving, Union Manufacturing, Stellantis Industrial System (SIS), Workplace Integration Process (WIP), Daily Management, Executive KPI Reporting

Technical: Six Sigma, TPM, Robotics (Fanuc, ABB, Yaskawa), Allen-Bradley & Siemens PLCs, MES/SCADA, Industry 4.0, Automated Assembly & Machining

EDUCATION

Lawrence Technological University | Master of Engineering – Manufacturing Systems
